EXPERIENCE

Front-end Developer   Jun 2017 - Mar 2020
Transcosmos Asia Philippines

- Developed pixel-perfect and responsive websites for various clients by translating design mockups.
- Created cross-browser compatible web-apps using W3C standards, ensuring consistent functionality across major browsers.
- Optimized web page performance, achieving an average 23% reduction in loading time, thereby enhancing user engagement and website usability.
- Collaborated with senior and junior developers to deliver features to production, contributing to a 10% improvement in team performance.
- Proactively debugged and resolved website-related issues, ensuring smooth user experiences and client satisfaction.

Front-end Developer   Jan 2021 - May 2021
Oost&Voort Inc.

- Developed a modern, user-friendly web app using React.js, collaborating within a team of developers.
- Translated design mockups into pixel-perfect and responsive websites.
- Collaborated with UI designers to ensure high-quality implementations.

Front-end Developer (Freelance)   Dec 2021 - April 2022
Brunchmate

- Built a custom ecommerce website using WordPress, WooCommerce, Elementor and industry best practices.
- Optimized website performance by minimizing code and optimizing images, resulting in a 54% improvement in load time.
- Trained clients to manage and update their websites independently.

Front-end Developer (Freelance)   May 2022 - Present
Espacio Manila

- Developed a user-friendly catalog website for an art gallery using React.js, Tailwind CSS, and other modern web technologies, transitioning from a previous WordPress implementation.
- Ensured website security through regular backups.
- Collaborated with clients to understand their requirements and delivered tailored solutions.
